

# Autowise V16

Designed for heavy duty tasks

The Autowise V16 sweeper is a new product range jointly developed by Hualin and BYD. It is a new multifunctional vehicle that integrates flushing, sweeping and garbage collection for different users. It can be widely used in city roads, highways and tunnels with high efficiency. When sweeping, it can recycle the sewage produced by high-pressure flushing and sweeping at the same time, avoiding secondary pollution.

## Features:

Sensors & Radars

Automatic Garbage Dumper

Manual & Autonomous Mode

Large Water Tank

Hydraulic Power Washer

Zero CO2 Emission

## Measurements:

Item	Measurement
Fresh Water tank capacity	6.1m <sup>3</sup>
Hopper capacity	6.5m <sup>3</sup>
Base weight	15,150kg
Payload	720kg
Maximum cleaning width	3.5m
Dimensions	W: 2,500 mm/ H: 3,260 mm/ L: 8,265 mm
