

# Autowise V2

## Designed for precision

Autowise V2 is an autonomous road sweeper that is smarter than ever. It is produced in Shanghai, China, and comes in two payload sizes (2 tons and 5 tons). You can use the Autowise V2 in closed areas for autonomous various sweeping operations. Equipped with a combination of lidars, cameras, mm-waves radars, and GNSS antennas, the Autowise V2 sweeper has a 360° coverage of its surrounding environment.

The combination of an articulated steering dexterity, sweeping width of 2400mm, and 3.3m turning radius allow the sweeper to perform a range of autonomous cleaning operations such as curbside cleaning, scrubbing, and dirt suction.

### Features :

Sensors & Radars

Adjustable Suction Speed

Manual & Autonomous Mode

Level 4 Autonomous Mode

Articulated Steering

Zero CO2 Emission

### Measurements:

Item	Measurement
Fresh Water tank capacity	150L
Hopper capacity	650L
Base weight	1,850kg
Gross vehicle weight	2,500kg
Maximum cleaning width	2,000mm
Dimensions	W: 1,210 mm/ H: 2,100 mm/ L: 3,735 mm
